# DIGITAL PRESSURE METERS

*BC Biomedical DPM-2000 Series*

This microprocessor based series of meters offers not only positive & negative pressure sensing of compatible liquids & gases, but also has models that offer Temperature & RS232.

All of the BC Biomedical DPM-2000 models measure positive and negative pressure, and are compatible with both liquid and gases. The DPM-2001 is the base model. The DPM-2001 PLUS adds a "Min/Max" feature plus an RS-232 port. The top-of-the-line DPM-2100 is a pressure/temperature meter. It has all the features of the PLUS model and also includes a YSI 700 temperature probe interface.

Each model has a battery life display (0 to 100%), LCD contrast is software adjustable, digital calibration-no pots to turn, .1% of full scale accuracy, -13.50 to 100.00 PSI range, digital zero adjust, and four pressure scales: PSI, inH<sub>2</sub>O, cmH<sub>2</sub>O and mmHG.
